---

## Livingston High School

1997 – 2001

- Graduated with diploma; completed focused coursework in automotive technology, computer basics, and woodworking
- Studied Auto Shop for 2 years, gaining hands-on experience with tools, mechanical systems, and vehicle maintenance
- Completed half-semester in Computer Studies, learning foundational skills in software and digital tools
- Completed half-semester in Wood Shop, developing practical skills in measurement, cutting, and project assembly

---

## Dam Steel and Supply Welder

2019-2025

- Welded steel products for customers both in-shop and on job sites, ensuring structural integrity and project compatibility
- Assisted customers with selecting steel materials, answering technical questions about applications
- Provided guidance on welding techniques and project planning, helping customers troubleshoot and refine their builds
- Supported customers with handling, loading, and transporting purchased steel safely and efficiently

- Maintained a clean, organized workspace and ensured tools and equipment were properly maintained for daily use
- Built strong customer relationships through reliable service, clear communication, and hands-on support

#### **Porite Powdered Metal Press Operator**

2010–2017

- Operated powder metal press machinery to produce precision components, ensuring consistent cycle times and material flow
- Conducted detailed product inspections using calipers, micrometers, and visual checks to maintain dimensional accuracy and part specifications
- Identified and documented surface defects, cracks, and irregularities to uphold quality standards and prevent downstream issues
- Monitored press output and adjusted parameters to optimize part consistency and reduce scrap rates
- Learned press setup procedures, including die alignment, tool changes, and startup calibration for efficient production runs
- Maintained clean, organized workstations and followed safety protocols in a high-volume manufacturing environment
- Collaborated with quality control and maintenance teams to troubleshoot press issues and improve production reliability

#### **Harroff and associates Laborer**

2003–2004

- Built and installed boat houses and bulkheads, applying structural carpentry techniques and shoreline reinforcement strategies
- Operated power tools and heavy equipment to prepare waterfront sites and assemble framing components
- Collaborated on marine construction projects with attention to safety, durability, and environmental impact
- Initiated hands-on training in welding fundamentals, including MIG welding, metal prep, and safety protocols
- Gained experience in material handling, layout planning, and basic fabrication for metal structures
- Demonstrated adaptability by expanding skill set from wood-based construction to metalwork and welding

- Demonstrated adaptability by expanding skill set to include heavy equipment operation

### **S&C Leathers Sales Representative**

1996–1999

- Managed retail sales at motorcycle swap meets, engaging with customers in fast-paced, outdoor environments
- Set up and organized product displays to attract attention and highlight key merchandise
- Handled cash and digital transactions, maintained accurate records, and provided change and receipts
- Answered customer questions about motorcycle parts, accessories, and gear, offering knowledgeable recommendations
- Built rapport with repeat buyers and vendors, contributing to a loyal customer base and positive brand reputation
- Packed, transported, and assembled booth setups efficiently for multi-day events across various locations
- Adapted sales strategies to seasonal trends, crowd flow, and inventory availability

---

### **Core Skills**

- MIG Welding: Proficient in welding steel components for structural and custom applications
- Stick Welding: Experienced in outdoor and heavy-duty welding tasks with various electrode types
- Basic Computer Skills: Comfortable with file management, email, and productivity software (e.g., Word, Excel)
- Customer Service: Skilled in assisting clients with product selection, troubleshooting, and project support
- Retail Sales: Experienced in managing transactions, organizing displays, and building rapport with buyers

### **Developing Skills**

- HTML, CSS, and JavaScript – building responsive web apps
- GitHub & LinkedIn – formatting links and presenting portfolio projects professionally
- Accessibility & UX – adding ARIA labels, button types, and troubleshooting layout issues
